

person centered fall prevention

reduce resident falls - provide families peace of mind - no added cost to the community

upBed is a soft wearable anklet that provides an **early indication** of a bed exit, notifies staff **silently** through your call system, and has **reduced falls by 90%**. upBed informs your care plan with data on common wake up times and sleep quality.

upBed is compliant with the CMS guidelines, and families value the peace of mind upBed provides. Contact us today to learn how upBed can help reduce falls in your community.
